Re: Summary of Learn Everywhere Program Provider Annual Reports

State Board of Education,

As required by Ed 1405.01, Learn Everywhere program providers must submit an annual report to the State Board of Education in September of each year. The report shall include, at a minimum, a brief statement explaining how the program is meeting the goals of its mission statement; and the number of students enrolled in the program and the number of students awarded certificates leading to high school credits for the previous school year.

This report has been prepared by the New Hampshire Department of Education's Administrator of Educational Pathways to summarize the Learn Everywhere program providers required annual reports. Learn Everywhere program providers were directed to provide participation and credit award data for the reporting period of July 1, 2021 through June 30, 2022. This data is summarized in the following table.

Learn Everywhere Program Provider	Number of Students Enrolled in Program	Number of Students Awarded Credits	Comments
New Hampshire Academy of Science	7	7	None.
Signum Academy	No report received.	No report received.	Program expired on 1/13/2022. Elected not to renew.
Kumon	No report received.	No report received.	Program expired on 2/10/2022. Elected not to renew.
Portsmouth Aikido	0	0	
North Main Music	0	0	Required reporting information provided within renewal

			application approved on 8/1/2022.
Seacoast Science Center	0	0	None.
Boys and Girls Club of Souhegan Valley	No report received.	No report received.	Program expired on 8/26/2022. Elected not to renew.
FIRST Robotics	1	1	Student earned 3 ½ credits.
Seacoast United Sports	No report received.	No report received.	Program expired on 8/26/2022. Elected not to renew.
Neil Stone's Karate Academy	0	0	Requested information provided in an email rather than a formal report.
izzit.org	0	0	Program approved on 11/19/21. Will run first programming in Fall of 2022
Sylvan Learning Center	0	0	None.
Comligo USA, Inc.	0	0	None.
Uptime Esports	0	0	Program approved on 3/10/22. Will offer first programming in the Fall of 2022.

Copies of the individual Learn Everywhere program provider annual reports that were received are attached.

Respectfully submitted,

Timothy C. Carney
 Administrator of Educational Pathways

(a) A brief statement explaining how the program is meeting the goals of its mission statement

The NHAS Learn Everywhere (LE) program has specific goals that each student must complete in their summer program. The NHAS LE had 7 students in the LE this first year. As our rubric and curriculum detail, these included the students' written research proposals, their execution of the bench research, the gathering of results including any relevant statistical analyses and graphical representation. These lead to the students presenting their research in final research papers and presenting their work in abstracts and poster presentations. All of the students in the LE program who began, finished and all received a certificate of completion. All LE students also went onto presenting their work at a national conference of the American Association for the Advancement of Science (AAAS) and all published their posters on the "Project Board". Finally, all LE students published their research in abstract format with the AAAS. We believe this completely fulfills the goals and objectives that were the basis upon which we received LE approval by the NH Department of Education.

(b) The number of students enrolled in the program and the number of students awarded certificates leading to high school credits for the previous school year.

In the 2020/2021 New Hampshire Academy of Science had Seven (7) students enroll in and earn Learn Everywhere credit.

Portsmouth Aikido Learn Everywhere NH Annual Report 2022

To the NH State Board of Education,

Portsmouth Aikido is a 501(c)3 educational non-profit organization dedicated to practicing and teaching the traditional Japanese martial art of Aikido. Our goal is to provide top notch instruction and a positive community for kids and adults to learn Aikido.

We have been in continuous operation since 1995, and despite the many challenges posed by the pandemic we have maintained our practice throughout and currently offer classes seven days a week with approximately 75 students at the dojo.

We currently have one student participating in LENH, a sophomore at Portsmouth High school. He is scheduled to earn his first ½ credit in the fall. He is our first LENH participant.

Overall, we are happy to offer the opportunity for young people to earn academic credits, and we have a [full page on our website](#) to help promote the program. We have yet to find much interest in the program on our own, and we would appreciate whatever help the state could provide to spread the word. If other organizations have found success in this regard, we would appreciate hearing more about what they've done.

Our biggest challenge thus far has been coordinating with the cooperating school. When our current student first expressed interest in earning academic credits throughout our LENH program, I reached out to his guidance counselor at PHS. She was unaware of the program and told me he would not be able to earn credits because I/we had not gotten prior approval.

Nate Greene and Tim Carney were extremely helpful in clearing up this matter, and tactfully but convincingly got the matter cleared up. One request for us moving forward would be to reach out more to schools so that if we get new students in the future their schools are aware that LENH is a pre-approved means of earning credit to help avoid further complications.

Thank you for having us in the program. If you have questions for us or if we can provide further info, let me know.

Best Regards,

Dear Tim,

This letter serves as the 2021/22 annual report for the FIRST NH Learn Everywhere (LE) program. In this initial year for the FIRST NH LE program, the focus has been on creating awareness within our high school level FIRST teams that students can now earn course credit for the skills and competencies that they have developed through their participation in FIRST. For many of our students, the LE program allows them to earn credit in subject areas that are not normally available to them through the standard curriculum, and the LE program recognizes that the skills they acquire through FIRST form a meaningful part of their education and career development.

For the 2021/22 school year, FIRST NH had one student complete the LE program and this student received 3½ credits across 4 subject areas:

- Business Technology (1 credit)
- Marketing (½ credit)
- Business Education (1 credit)
- Computer Science (1 credit)

The FIRST NH LE program is a new opportunity for our students, mentors and schools, and it has taken some time for everyone to become familiar with the LE program, the course offerings, and the process to be followed in order to earn those credits. While we have had considerable interest in the LE program among our FIRST teams, we had only that one student complete the requirements and receive course credits. However, we are encouraged by the interest that all have shown in the LE program and we look forward to a significant increase in the program participation in the coming school year. On behalf of all our NH FIRST students, we thank the NH Department of Education for this unique opportunity that the LE program represents.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Ken St. Hilaire", written in a cursive style.

Subject:Re: Learn Everywhere Annual Reporting

Good Afternoon, Timothy,

Thank you for your email. I will do my best to answer the questions below. We have not had anyone in this program at all. I am not sure if there are any materials that you have that we may use to be able to market it better with the school districts, or if there is anyway you could all help us get the word out? If there is anything else you may need from us please do not hesitate to ask us.

Thank you again for the opportunity to be part of your organization.

We hope you have a great night!

Neil Stone

**SSC Annual Learn Everywhere Report
(for the period of July 1, 2021 through June 30, 2022)**

Pursuant to Ed 1405.01 Alternative Program for High School Graduation Credit Reporting Requirements, Seacoast Science Center respectfully submits to the state board this annual report of its program outcomes, for the period of July 1, 2021 through June 30, 2022

(a) SSC hereby states that there have been no changes to its approved Learn Everywhere program. The 0.5 credit (science elective) **Marine Science Fellowship** Certificate is a semester-long marine science field science investigation and research learning opportunity for high school sophomores, juniors and seniors. This program provides students with an introduction to marine biology and marine science, engages students in hands-on field investigations, fosters scientific inquiry skills and practices, builds self-efficacy around nature of science, and introduces students to local scientists, conservationists, and other career professionals in the marine sciences fields.

(b) 0 students were enrolled in the program for this period and 0 students were awarded certificates leading to high school credits for the previous school year.

Annual Report 2022

Dear Tim,

izzit.org will be accepting applications for the first time for its course Civics Fundamentals, this November 2022. Our applicants will be notified with a start date of January 2023 (second semester) of the 2022-2023 school year. Our program is 16 weeks, allowing for those matriculating (and eligible) for credit to be awarded by May 2023, for their high school transcripts.

Our website, izzit.org will have information including the application, our syllabus and logistics for those applying beginning September 26, 2022. In addition, we will be holding informational Zoom meetings for students, parents/guardians in October and November 2022 (including am/pm dates and times) to accommodate all schedules which will also be included on our website and promoted at NH schools and our social media platforms.

Thank you,

Dean Graziano, J.D. | VP of Education

RE: Learn Everywhere Annual Reporting, Sylvan Learning

To Whom It May Concern:

(a) A brief statement explaining how the program is meeting the goals of its mission statement.

The Learn Everywhere program is designed to give families the resources and autonomy to choose what educational paths are right for their high school students. The program allows students earn certificates for high school credits through the same organizations they are utilizing for other activities and services, such as tutoring. Sylvan Learning has provided supplemental educational support to students in New Hampshire for over 20 years. Through the Sylvan for Credit program for the Learn Everywhere, New Hampshire high school students can receive credit for academic courses completed outside of the public school. Each Learn Everywhere Sylvan for Credit student is assigned a course teacher to grade items, track progress, and respond to student questions, a Student Success Coach to monitor the student's progress and notify the Sylvan management and instructional team of issues, and a Sylvan Academic Coach to provide course content support as appropriate and explicit instruction in study skills such as time management, goal setting, note-taking, and test preparation.

(b) The number of students enrolled in the program and the number of students awarded certificates leading to high school credits for the previous school year.

To date, no students have enrolled in the Sylvan for Credit program for Learn Everywhere, and therefore no students have received certificates leading to high school credits for the previous school year.

Sincerely,

Krista R Martin

Annual Report to New Hampshire State Board of Education

Comligo USA, Inc. - Learn Everywhere program provider

- I. Statement explaining how the program is meeting the goals of its mission statement

Mission statement as included in the provider's application:

"Our mission at Comligo is to promote the study and teaching of the Spanish language around the world, while contributing to widening understanding and dissemination of the Hispanic cultures.

We aim at providing good quality teaching and learning with a tailor-made online platform and an enthusiastic well qualified team of native teachers."

To promote the study and understanding of the Spanish language and cultures, we have reached out to different K-12 institutions in New Hampshire, to explain about our course offering and services.

- II. Number of students enrolled in the program and the number of students awarded certificates

No students enrolled in the program since its approval in November 2021.
