GEPA 427 General Educational Provisions Act

Section 427 requires each district applying for funds to include in its application a description of the steps the district proposes to take to ensure equitable access to and participation in its federally assisted programs for students, teachers, and other program beneficiaries with special needs. The statute highlights six types of barriers that can impede equitable access or participation: gender, race, national origin, color, disability, or age. Based on local circumstances, you should determine whether these or other barriers may prevent your students, teachers, et al from such access to, or participation in, the federally funded project or activities.

1. How does the district ensure equitable access for students and teachers to participate in federally assisted programs?

2. The New Hampshire DOE has created NECAP Longitudinal Reports for each district to analyze NECAP data related to equitable access. The NECAP Longitudinal Reports can be found on the department website at <http://www.education.nh.gov/longitudinalreports/index.htm>. Gap analysis reports for subgroups are available at the district and school level. This information may be used to examine trends and results for ELA and mathematics for the following disaggregated populations: gender, race, national origin (LEP), color, disability, and age. If discrepancies for subgroups when compared to the whole are identified please indicate the **gap** and provide a statement of what efforts the district will undertake to address the discrepancies to ensure that all students become proficient in ELA and mathematics. **Please present the information in the District Level Data Analysis template below.**

EXAMPLE

District	Content Area	Subgroup	Trend and Gap Analysis	Plan to Ensure Equitable Access
District name here	Math	IEP	Trend: Gained 10% percentage points; Gap of 30% remains	Intervention: Students will be provided with increased instructional time for “catch up” growth in identified math deficiencies.
