

SCHOOL FACT SHEET FOR HIGH SCHOOL EQUIVALENCY TESTING IN 2014 AND BEYOND

To: New Hampshire High Schools
From: High School Equivalency Administrator,
NH Department of Education
Date: September, 2014, *revised September, 2015, revised January 2017*

The GED® Tests have changed and are no longer being given in New Hampshire. The New Hampshire Department of Education adopted the HiSET™ Tests developed by Educational Testing Service to assess high school equivalency for NH students, effective January 1, 2014. Previous test-takers who did not complete and pass all sections of the GED Tests by December 31, 2013, must start over with the HiSET Tests. If you have questions, please contact Sarah.Bennett@doe.nh.gov

What remains the same?

- HiSET Tests will assess reading, writing, math, science, and social studies
- The complete test battery takes about seven hours.
- HiSET Tests require that test-takers do better than 40% of high school seniors in a national random sample (the same standard used for GED Tests in the past.)
- Test-takers who pass all sections of the HiSET test battery will receive the New Hampshire Certificate of High School Equivalency signed by the Commissioner of Education.
- In New Hampshire, students aged 16 and 17 can register for HiSET testing only if referred by school officials after demonstrating the ability to pass official practice tests. The form is available on the NH Department of Education website.
- Schools may choose to offer a High School Equivalency Preparation Option Program. Contact Sarah Bennett for more information. Sarah.Bennett@doe.nh.gov
- HiSET graduates may be reported as “completers” in the i4See system.

- Testing will continue to take place at approved testing centers, the same locations that provided GED Testing in the past.
- All New Hampshire testing centers will offer paper-based HiSET testing.
- Test-takers will schedule and pay for testing at their local testing center.

What will be different?

- Students referred for HiSET testing may remain enrolled in school during the testing process.
- As of January 1, 2017, the HiSET fees will be \$20 per subtest.
- Some NH testing centers will offer a computer-based testing option.

- Students will register for HiSET through an online portal before being referred to a local testing center.
- Students will have the option to demonstrate “college and career readiness” by achieving a score higher than the required passing level.
- All public high schools were sent an Official Practice Test in January 2016.
