  - **Annual Dropout %**: 0.00%
  - **4 Year Cumulative Dropout Rate**: 0.00%
## What's New:

Beginning with 2009-2010 the Department will produce a cohort dropout rate along with the yearly dropout rate. The cohort rate is based on the New England Secondary School Consortium (NESSC) definition. Students are assigned to cohorts based on when they first enter grade 9. Once a student is assigned to a cohort year the student's cohort never changes. The cohort is adjusted by students transferring in and transferring out. The annual dropout rate measures the percentage of students who drop out of school in a single school year. The particular cohort dropout rate measures the percentage of students who dropped out over a four year period. Students that dropped out of school and are enrolled in college are included in the Dropped Out(b) count and NESCC Dropouts only rate. The cohort year used for this report is the class of 2010.

### Footnotes:

1. These are students that exited high school during the 09-10 school year but subsequently received a GED certificate from the State of NH as a result of testing at one of the 21 NH GED testing centers. Only students that voluntarily granted access to their high transcripts have been counted on this high school report. Any student who did not grant access to their transcripts or who received a GED from another state could not be verified and therefore has been counted as "Dropped Out."
2. These are non-GED early exit students who enrolled in at least one college course. National Clearing House data, which contains enrollment verification for 92% of US two and four year college students, was used to identify enrollment. GED college students have been counted as GED only. They are not double counted.
3. Dropouts are early exit non-graduates that have not been identified as either receiving a GED or enrolling in college. One hundred and thirty five (135) dropouts that were counted as dropouts for 06-07, 07-08 or 08-09 have been excluded to avoid double counting.
4. Different rate calculations must be used for high migration schools. Annual rates are calculated by dividing the count by the number of individual students enrolled throughout the year less the number that transferred out. Since the expected time till graduation varies with each student and is usually shorter than 4 years, the cumulative rate is not applicable. This applies to North Country Charter Academy, Great Bay eLearning Charter School, Ledyard Charter Academy, CSI Charter School and Virtual Learning Academy Charter School only.
5. The number of students who were in the Class of 2010 between the years of 2006-2010. Students are assigned to cohorts based on when they first enter grades 9. Once a student is assigned to a particular cohort year the student's cohort never changes. The cohort is adjusted by students transferring in and transferring out. The following counts are based upon the set of students identified in the cohort count.
6. All students who exited high school during the 06-07 to 09-10 school year without a standard, non-standard, other high school diploma, Adult Education Diploma or are not still enrolled in high school are "Early Exiters". Early Exiters can be divided into sub-categories (currently 2). They are Earned GED and Dropped Out.
   a. These are students that exited high school during the 06-07 through 09-10 school year but subsequently received a GED certificate from the State of NH as a result of testing at one of the 21 NH GED testing centers. Only students that voluntarily granted access to their high school transcripts have been counted on this high school report.
   b. These are students that exited high school during the 06-07 through 09-10 school year but did not graduate (with a standard, non-standard, other high school diploma or Adult Education Diploma), or are not still enrolled in high school and did not receive a GED, and did not enroll in college.

### Annual Counts:

**Definition of an early exit:** For 2009-2010, any student who completed the 2008-2009 school year but did not return to school in September 2009, or who left high school during the 2009-2010 school year and did not return to high school by October 1, 2010. The definition does not include students who were home schooled, suspended, temporarily expelled, truants, incarcerated; or who completed a high school program (diploma or certificate), transferred to another high school, or died.

**Annual Dropout Rate** = Dropouts divided by the October 1, 2009 enrollment plus students that dropped out before October 1st.

**Cumulative Rates** = 1 - (1 - annual rate)^4. This formula applies the annual rate to a progressively declining base population. The cumulative rate represents the percentage of current students who will early exit or drop out before reaching graduation if the annual rate does not change.

### Cohort Counts:

**Definition of an early exit:** For 2009-2010, any student who exited high school during the 06-07 to 09-10 school year without a standard or non-standard or other high school diploma or Adult Education Diploma or are not still enrolled in high school.

**Definition of a dropout:** For 2009-2010, any student who exited high school during the 06-07 through 09-10 school year but did not graduate (with a standard, non-standard or other high school diploma or Adult Education Diploma), or are not still enrolled in high school and did not receive a GED.

**Dropouts Only Rate:** Total Dropouts divided by the cohort count.
