

# Critical Shortage Report Survey

Each year the Department of Education conducts a survey to determine which endorsements should be included on the Critical Shortage List. This list is used for the purpose of determining eligibility for Site Based Licensure Pathway (SBLP). It is also submitted to the federal government to be used for student loan deferment determination.

This survey gathers counts by endorsement for vacancies that occurred during the previous school year. It also asks for any vacancies that still exist at the time of the report (usually in mid-August

The survey also includes columns to identify those positions that were difficult to fill and the reasons why. Data on all the difficult to fill positions is wanted whether they have been filled or are still vacant.

All surveys need to be certified by the superintendent before they will be considered completed.
