Helpful Zoom Security Tips for NH Educational Professionals

There have been multiple reports of uninvited people gaining access to Zoom meetings with the intent to cause meeting interruptions and share inappropriate information. Here are some tips to help prevent this from happening and limit damage.

Best practice is to use a combination of options below that makes the most sense for your meeting.

- **Turn Screen Sharing by Host only**
  *Check this at the start of each meeting!*

- **Use Zoom Meeting password feature**
  *Remember if you share the password widely this is less secure but will prevent random meeting ID guessing*

- **Use a Waiting Room**

- **Use Remove participant**
  *Zoom provides additional guidance on this feature.*
