CONTRACT PERIOD

From the date of approval by Governor and Council through 6/30/20, with the option to renew for two additional years at sole option of the State.

PURPOSE

The contractor will assist the NH Department of Education in updating the proprietary i4see application and design, by building, deploying, and facilitating the conversions of Career and Technical Education and English Speakers of Other Languages applications and databases to the proprietary i4see application and database. The contractor will also update the common database application and schema; enhance the proprietary ESS survey system; and update, build, and create SSRS reports and submission applications.

I. BACKGROUND INFORMATION

The Initiative for School Empowerment and Excellence (i4see) is a student level data collection that eliminates many of the aggregate school and district reports. i4see reduces the burden on districts, improves the quality of data and enables important analysis such as gains based analysis of assessments and the ability to help reduce the drop-out rate.

i4see has changed the way the department collects and leverages student and school data. Central to the effort is an overarching principle that we should not only collect data for reporting needs, but that we should add value to the data being collected and provide information back to schools to empower teachers, administrators, policy makers, and parents to increase student achievement - enabling schools to follow every child and to analyze groups of students over time.

Administrators and teachers have easy access to valuable data, helping improve the education for every child. The assignment of a state assigned student identifier (SASID) was the first deliverable of this initiative.

As part of a department-wide Data Governance initiative, iDefine was created to expose all the data elements collected from our schools and districts as well as from external vendors. The
The purpose of this tool is to allow users to explore all the data elements collected by the NH DOE and understand their purpose and usage.

Most of the data is collected through the i4see application in the form of a submission by the schools and districts. However, the program areas also work with other applications and interfaces that result in many data elements being collected. The collections have been separated to serve as a reference for the schools to aid with their submission process.

Public School Districts submit their student level data through i4see in the form of submissions according to a submission calendar. This data provides the common datasets used by all the program areas to obtain information on student membership and demographics.

Program areas within the DOE often require the use of other data sets to satisfy the requirements of federal and state regulations on their functions. These data sets can also be the result of data collected by administering their day-to-day operations.

Currently the DOE supports the ESOL (English Speakers of Other Languages) system to allow schools to identify EL students and ensure services are provided for these students. The stand along system has many similarities to the i4see system and additionally, the ESOL system does not meet all the needs of the schools. Adding the required ESOL functionality to the existing i4see system can meet the user needs while reducing the IT burden of maintaining two separate system.

The NH DOE Career Development Bureau follows data storage, maintenance, and integrity guidelines in compliance with State policies established by the New Hampshire Department of Information Technology (DoIT) and the New Hampshire Department of Education (NHDOE). All data systems in the various departments of the State of New Hampshire must conform to the standards established by the New Hampshire Department of Information Technology.

All student-level data in New Hampshire’s public schools are collected using unique State Assigned Student Identifiers (SASIDs), which remain with a student from his or her entry into public school through completion of secondary education. SASIDs are used to link student data from the NHDOE’s Initiative for School Empowerment and Excellence (i4see) database to other student-level databases maintained in the NHDOE, including the Career and Technical Education (CATE) database.

The i4see system maintains an extensive data access and management policy governing proper handling of the student-level data in its custody, and the NH DOE Career Development Bureau follows i4see policies in the CATE system. This ensures the highest possible quality for CTE data, and creates smooth linkages between the CATE system and other student level databases maintained in the NHDOE, including those for special education, English language learners, and ESEA assessments. The i4see Student Data Access and Management Policy is outlined in the i4see Policies and Procedures Manual (http://www.education.nh.gov/data/documents/ppmanual.doc).
II. REQUIREMENTS/ELIGIBILITY

A successful bidder will have five or more years’ experience with application development and coding implementations including data validation systems. Proficiency in various programming languages including SQL, C#, VB.Net, Javascript, CSS and HTML5 is required. Demonstrated history of work in government industry preferred. Knowledge of New Hampshire Department of Education reporting requirements as well as experience with Tableau, Education data, and Federal Funding of educational programs as well as familiarity with current New Hampshire Department of Education applications and programs is a plus. The bidder will understand the types of data collected through this system; the organizational design necessary to extract a variety of reports; and will possess the ability to complete this project in a timely manner.
