## Questions and Responses

#	Question	From	Response
1	Can you provide an update regarding the August RFP and clarify if this new RFP replaces it?	Perks	The RFP posted on 12/21/18 replaces the August 2018 RFP. Clarifying language was added to the 12/21/18 RFP regarding award recipient(s), budget requirements and other items.
2	If the new RFP replaces the August RFP, would we need to resubmit an entire new package or could we send the additional information being requested? - E.g. as an amendment?	Perks	A new package/proposal would need to be submitted.
3	What is the expectation/limitation for the length/page limit for the letter of interest?	Barbour	There is no expectation or limitation for length or page limit for the letter of interest.
4	Will more than one partner be selected? Will each partner be awarded \$500k or will the \$500 be divided between the two? Will schools be grouped in some cohort approach for specific types of support? Is this something we should consider in our approach as expressed in the letter of intent?	Barbour	It is possible that more than one partner could be selected. The amount for the RFP is not to exceed \$500,000; therefore, the amount would be divided as the NHDOE sees appropriate should more than one partner be selected. The proposals submitted should outline how support will be provided to schools based on the entities approach to school improvement.
