State Determined Performance Levels (SDPL) Form

To provide input on performance levels, please email Jeff Beard, at jeffry.beard@doe.nh.gov.

Explanation of State Determined Performance Levels

As a condition of receiving Perkins funds for CTE programs, each state must set and show progress toward a set of core indicators of performance. The State Plan for Perkins lasts for four years, and the State of New Hampshire must propose performance levels for each year of the four-year State Plan. The following core indicators of performance are for the part of the State Plan covering CTE programs funded by Perkins funds for the Community College System of New Hampshire (CCSNH).

Concentrator: At the postsecondary level, a student enrolled in an eligible recipient who has earned at least 12 credits within a career and technical education program or program of study; or completed such a program if the program encompasses fewer than 12 credits or the equivalent in total.

1P1: Percentage of CTE concentrators who, during the second quarter after program completion, remain enrolled in postsecondary education, are in advanced training, military service, or a service program (such as the Peace Corps), or are placed or retained in employment.

2P1: Percentage of CTE concentrators who receive a recognized postsecondary credential during participation in or within 1 year of program completion.

3P1: Percentage of CTE concentrators in CTE programs and programs of study that lead to non-traditional fields.
