### Data Notes

**SAT Participation and Performance:** Data reflect 2020 high school graduates who took the current SAT during high school. If a student took the SAT more than once, the most recent score and self-reported SAT questionnaire responses are summarized. SAT data contained in this report reflect frozen snapshots of College Board's integrated data system as of mid-July after each respective class graduated. Thus results may differ slightly from analyses run at other points in time or based on different population definitions.

**AP Participation and Performance:** AP Exams are administered at the end of each school year. Statistical Information about AP Exam takers is based on all students taking AP for each year reported.

**PSAT-related Assessments Participation and Performance:** Data reflect students who took PSAT/NMSQT and/or PSAT 10, or students who took PSAT 8/9 during the 2016-17, 2017-18, 2018-19 or 2019-20 school years. If a student tested more than once within an academic year and assessment (e.g., took PSAT/NMSQT in fall and then PSAT 10 in spring; or a student who took PSAT 8/9 in both fall and spring of particular school year), the most recent score and self-reported questionnaire responses are summarized. PSAT/NMSQT participation data from the October 2015 administrations are also presented.

**Mean Scores:** Throughout this report, mean scores are only reported for populations consisting of at least ten students.

**Racial/Ethnic Background:** Note the following regarding abbreviations of the reporting categories - American Indian includes Alaska Native, Black includes African American, and Pacific Islander includes Native Hawaiian. Although "Other" as an option has been discontinued it may continue to be reported for historical reporting purposes. Students who are reported as "Two or more races" are non-Hispanic. Hispanic includes all students who self-identified as Cuban; Mexican; Puerto Rican; or Another Hispanic, Latino, or Latin American on the ethnicity portion of the race/ethnicity questionnaire.

**Change from Last Year:** The change from last year for frequency data (number of test-takers or exams) is represented as a percentage change. It is obtained by subtracting the previous year's total from the current year and then dividing this difference by the previous year's total, which is then multiplied by 100.
