

# 2024-2025 NH SAS Interim and Modular Assessment Support Program

## Overview

**Did you know you have assessments that can improve student outcomes at your fingertips?**

Our staff can work with your school district to help maximize your use of the NH SAS Interim and Modular assessments, analyze the data, and in turn better understand grade level standards.

## Benefits

### Knowledge

Teachers can explore questions to gain a deeper understanding of the standards enhancing their instructional practices.

Teachers will develop a clearer understanding of what they need to teach, and the level of knowledge students are expected to attain.

Teachers can identify where time can be saved and where their instructional focus should be prioritized.

### Practice & Choice

Teachers can select specific modulars and/or questions to assess student understanding.

Modular assessments are short and domain aligned and can be utilized as formative assessments or as daily exercises.

Students engage with the system to become familiar with the NH SAS testing platform.

### Flexibility

Our team will collaborate with your staff to identify specific school and district requirements and ensure that all needs are addressed.

Work through this program can be conducted remotely or in-person, either during the school day or after school.

We can collaborate with your entire staff or focus on specific teachers, grade levels, or teams.
